

Name: _____

The Amazingly Adapted Polar Bear

By Guy Belleranti

Animals have special adaptations that help them survive in their habitats. One of the most interesting is the polar bear of the Arctic.

To stay warm, polar bears have two layers of fur. The hairs of the outer coat are hollow, increasing their insulating ability. They also have a thick, warm coat of fur below the outer coat. Underneath their fur polar bears have black skin which helps absorb heat. Underneath this skin polar bears can put on a layer of fat for even

rough bumps on the soles of their wide, snowshoe-like feet provide traction on ice.

Polar bears are well adapted for swimming to ice floes in search of their favorite food—seals. They use their partially webbed front feet to paddle, while steering with their back feet. They have a more elongated body and head than other bears. This shape helps them move through the water. In fact, this marine mammal can swim for 60 miles without stopping.

Name: _____

The Amazingly Adapted Polar Bear

By Guy Belleranti

1. What color is a polar bear's skin?
