Reading Without Seeing

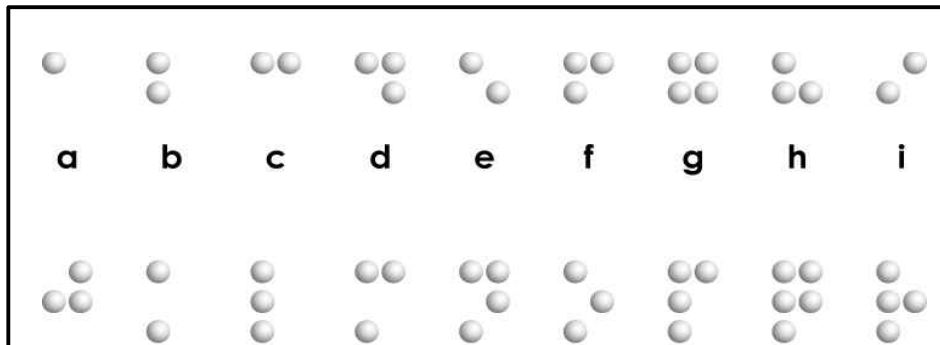

Did you know that blind people can read books? Even though they can't see, they do have a special system for reading that allows them to feel books and papers.

Close your eyes and feel a book. You probably can't feel the letters and words, can you? It would be impossible to read one of your books if you couldn't see. But what if the book has small dots that were bumps in the paper? You would be able to feel those. Now imagine the bumps are a code for letters.

Braille is the special alphabet that blind people use to read. Each character is made of small dots that rise out of the paper in a special pattern. Blind people read braille by using their fingers to feel each letter.

Here is a picture of what the patterns in the braille alphabet look like:

He wanted to be able to read and write just like everyone else. Since he couldn't see, he invented an alphabet made of dots.

Today, braille letters are found in books, on elevator buttons, on medicine boxes, and there are even braille computer keyboards. There are braille Monopoly boards. Disneyland has braille maps. Most McDonald's restaurants even have braille menus available for blind customers.

Name: _____

Braille Words

Write some words in braille. Be sure you draw the dots carefully.
Be sure you leave spaces between each letter.

example:

L o u i s

Your first name:

Your last name:

Y

Teacher Notes

Two Ways To Make Raised-Letter Braille Words

- a. Students can add the bumps to their braille words by putting tiny drops of white glue on the braille dots they've drawn.
- b. You can also make the letters raised using this method:

Step 1: Write out the braille letters with a pencil on paper.

Step 2: Place a piece of cardboard on the desk. Flip the paper upside-down on the cardboard.

Step 3: You should be able to see the pencil marks through the paper. Gently press a ball point pen into the dots to create a bump on the other side.

Step 4: Flip the paper over and your students can try to read the raised braille bumps with their fingers.
