Name: _____

Fraction Addition

a. $\dfrac{3}{9} + \dfrac{2}{9} = $ _____

b. Use the model to complete the equation.

c. Talen ran for $\dfrac{7}{12}$ of a mile and swam for $\dfrac{4}{12}$ of a mile. How many miles did Talen complete all together?

Show your work.

answer: _____

d. Elena put $\dfrac{2}{5}$ of a cup of flour into her cookie batter and then added $\dfrac{1}{5}$ of a cup more. How many cups of flour did she put in the batter all together?

Show your work.

f. Fill in the missing value.

part	part
$\dfrac{4}{20}$	$\dfrac{16}{20}$

whole

Fraction Addition

a. $\dfrac{3}{9} + \dfrac{2}{9} = \dfrac{5}{9}$

d. Elena put $\dfrac{2}{5}$ of a cup of flour into her cookie batter and then added $\dfrac{1}{5}$ of a cup more. How many cups of flour did she put in

answer: $\dfrac{11}{12}$ **miles**

whole

$\dfrac{4}{20} + \dfrac{16}{20} = \dfrac{20}{20}$ or 1
