THE PIGGY BANK: CLEVER DESIGN OR MISUNDERSTANDING?

by Kelly Hashway

Piggy banks have been around for a long time, but did you ever wonder why people thought to make their banks in the shape of a pig?

Pigs have nothing to do with money. They don't store food like a camel or a squirrel. So how did we end up using a pig as the style of a bank? Believe it or not, it happened by mistake.

During the fifteenth century, metal was very expensive. Dishes and pots were made of a type of inexpensive orange clay called pygg, which was pronounced just like pig. At this time, there weren't banks like we have today, so people would store their money at home.

When people had extra coins to save, they would place them in clay jars or pots. Since the type of clay was called pygg, people started calling these jars piggy banks.

Over time, people started making piggy banks from other materials. So in the nineteenth century, when their customers were asking for banks in the shape of pigs, not banks made from pygg.

Today piggy banks are made from all kinds of materials, and they also come in a variety of shapes and animals. But the term piggy bank is still used to refer to these adorable containers for loose change.
