

# Multiplication & Division Game: "I Have... Who Has..."

## How to play the game:

- Distribute the cards randomly to your students. Some students may get more than one card.
- Select a student to begin by reading their card aloud.  
(example: I have 36. Who has  $4\overline{)28}$  ?)
- The child whose card comes next, will then read their card.  
(example: I have 7. Who has  $12\overline{)48}$  ?) And so on.
- Students must listen for their turn and try not to break the chain.
- When the chain circles around to the first student, the game is over.

## Suggestions:

- Print out the "I Have, Who Has" flashcards on card stock and laminate them so they will last for many years to come.
- Practice the game once with your students so they understand how to play, then see if they can "beat the timer." Set a timer for 2 minutes, 5 minutes, or whatever. Challenge them to finish the game before timer beeps.
