$$\begin{array}{r} \frac{3}{7} \\ - \frac{1}{7} \\ \hline \end{array}$$

# ANSWER KEY

## Subtracting Fractions

with the Same Denominator, No Simplifying

$$\begin{array}{r} \frac{3}{5} \\ - \frac{2}{5} \\ \hline \frac{1}{5} \end{array}$$

Diagram illustrating the subtraction process with arrows and labels:

- A bracket labeled "same" connects the denominators 5 and 5.
- An arrow points from the denominator 5 of the second fraction down to the denominator 5 of the result.
- An arrow points from the denominator 5 of the first fraction down to the denominator 5 of the result.
- An arrow points from the numerator 3 of the first fraction down to the numerator 1 of the result.
- An arrow points from the numerator 2 of the second fraction down to the numerator 1 of the result.
