

Name: _____

Page 1

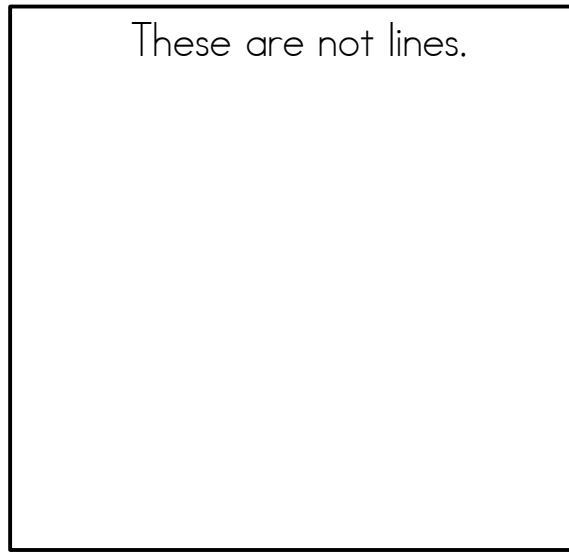

Math Notes: Geometry: Lines, Rays, and Line Segments

line – a _____ path that goes on _____ in
two _____

These are lines.

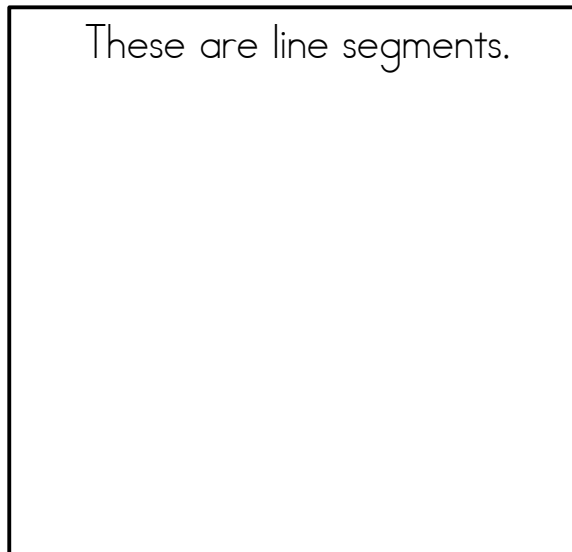

These are not lines.

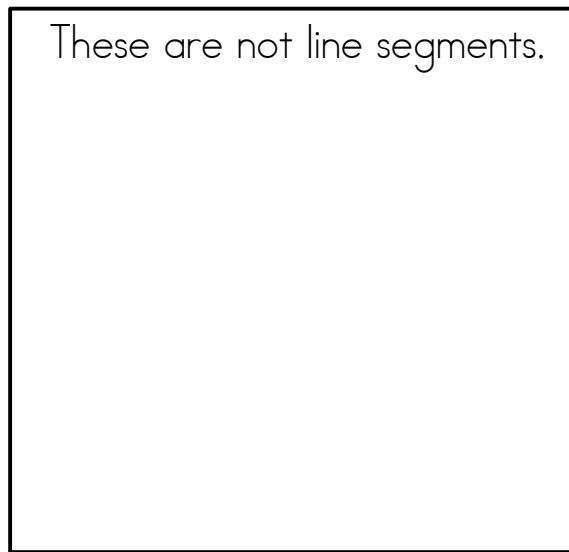

line segment – part of a _____ that has two _____

These are line segments.

These are not line segments.

Name: _____

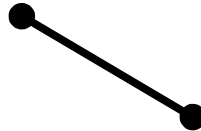

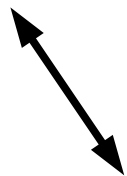

Math Notes: Geometry: Lines, Rays, and Line Segments

ray - a _____ path that goes on _____ in
only _____ direction.

These are rays.

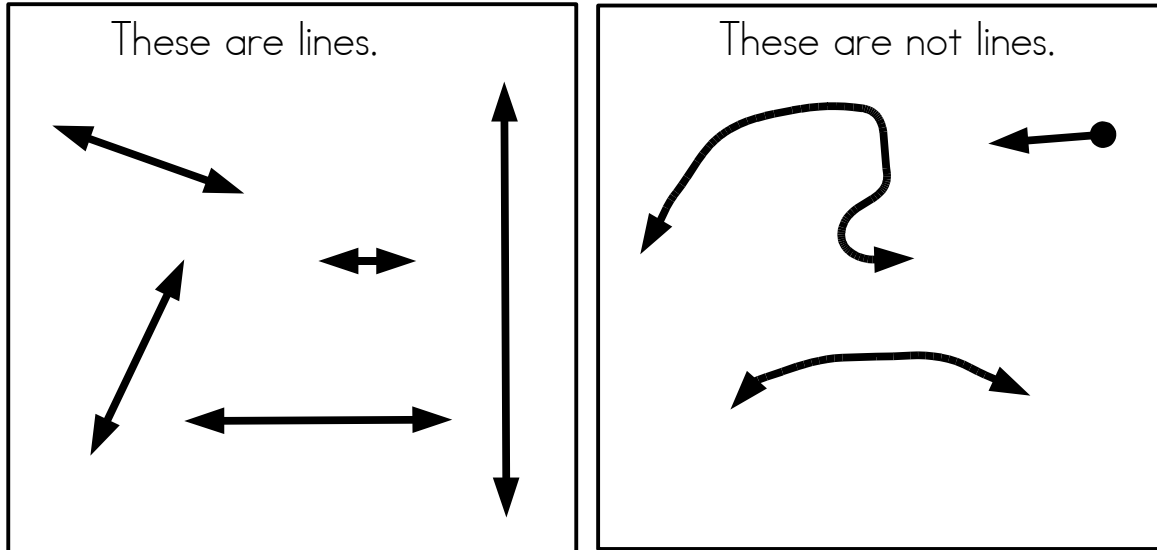

These are not rays.

Tell whether each figure below is a line, line segment, or a ray.

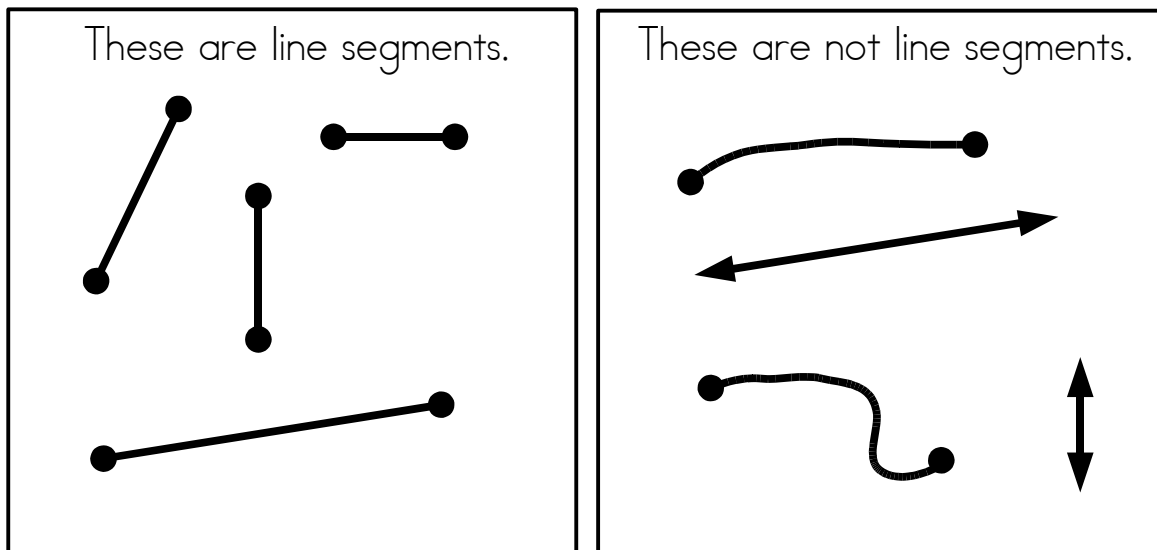

Math Notes: Geometry: Lines, Rays, and Line Segments
TEACHER NOTES

line – a **straight** path that goes on **forever** in two **directions**

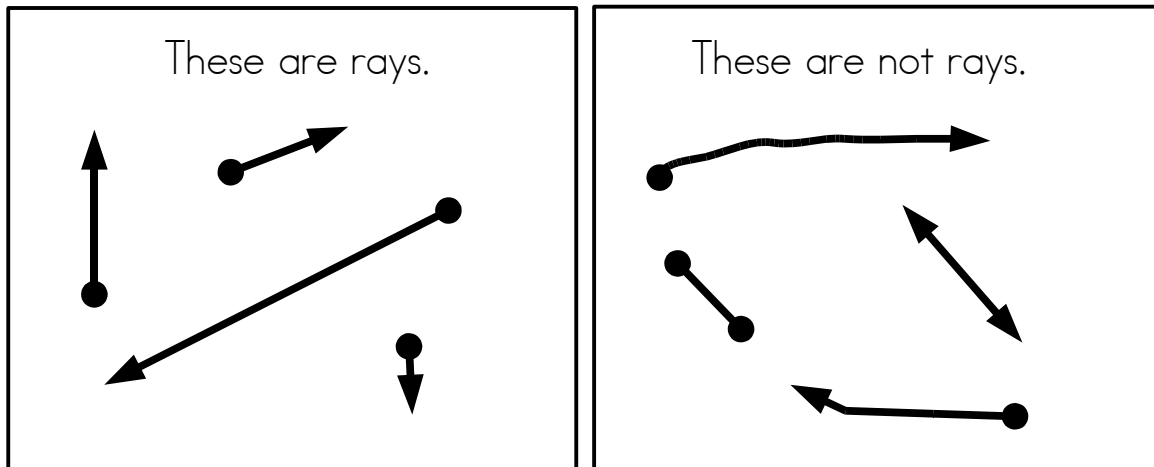

line segment – part of a **line** that has two **endpoints**

Math Notes: Geometry: Lines, Rays, and Line Segments
TEACHER NOTES

ray – a **straight** path that goes on **forever** in only **one** direction.

Tell whether each figure below is a line, line segment, or ray.
