

Name: _____

Habitat Temperature Chart

Directions: Look at the chart and answer the questions below.

Habitat	Average high summer temperature	Average low summer temperature	Average high winter temperature	Average low winter temperature
Desert	104° F	64° F	71° F	39° F
Forest	84° F	60° F	53° F	18° F
Grassland	88° F	55° F	46° F	25° F
Wetlands	84° F	78° F	80° F	75° F
Arctic Tundra	50° F	30° F	-30° F	-40° F

1. What is the average high temperature for the grasslands in the summer? _____
2. What is the average low temperature for the desert in the winter _____
3. Which two habitats have the same average high summer temperatures?
_____ and _____
4. Which habitat has the lowest average winter temperature? _____
5. Which habitat has the highest average summer temperature? _____

Name: _____

ANSWER KEY

Habitat Temperature Chart

Directions: Look at the chart and answer the questions below.

Habitat	Average high summer temperature	Average low summer temperature	Average high winter temperature	Average low winter temperature
Desert	104° F	64° F	71° F	39° F
Forest	84° F	60° F	53° F	18° F
Grassland	88° F	55° F	46° F	25° F
Wetlands	84° F	78° F	80° F	75° F
Arctic Tundra	50° F	30° F	-30° F	-40° F

1. What is the average high temperature for the grasslands in the summer? 88° F
2. What is the average low temperature for the desert in the winter?
39° F
3. Which two habitats have the same average high summer temperatures? forest and wetlands
4. Which habitat has the lowest average winter temperature?
arctic tundra
5. Which habitat has the highest average summer temperature?
desert
