$\qquad$

## Complementary Angles

When the measurements of two angles are added together and the sum equals $90^{\circ}$, they are called complementary angles.
example:

$\angle A=60^{\circ}$
$\angle B=30^{\circ}$
$60^{\circ}+30^{\circ}=90^{\circ}$
$\angle \mathrm{A}$ and $\angle \mathrm{B}$ are complementary angles.
Find the complement to each angle.
