**Sun Sum Game**

**Skills Overview**
- Students will practice finding pairs of numbers that add up to 16.

**Number of Players**
- 2 or 3

**Material**
- Game board

**Example:**

```
  8  4
  2  8  6  4
  8 10 8
```

**How to play**
Each player chooses a different color crayon. Players take turns finding and coloring pairs of adjacent squares that have a sum of 16. (For example, player 1 may color two joining shapes that have the numbers 6 and 8. Then player 2 may color joining shapes with the numbers 10 and 6.)

**Management suggestions**
- You may want to limit the amount of time a player is given to find a pair of numbers. (For example, if a player can’t find a matching pair in 20 seconds, they lose their turn.)

**Differentiation**
- The last page of this file has a blank template so teachers or students can create their own custom version of the game.
Sun Sum Game

Find pairs of adjacent shapes that add up to 16.
