

I Have...Who Has...

Addition Game

How to play the game:

- Distribute the cards randomly to your students. Some students may get more than one card.
- Select a student to begin by reading their card aloud. (example: I have 14. Who has who has $3+4$?)
- The student who has the card with the correct answer to the previous student's "Who Has..." question reads their card aloud. (example: I have 7. Who has $10+5$?) And so on.
- Students must listen for their turn and try not to break the chain.
- When the chain is circles around to the first student, the game is over.

Suggestions:

- Print out the "I Have, Who Has" flashcards on card stock and laminate them so they will last for many years to come

- Practice then see Challenge

ne works, whatever.
