What is a QR code?

QR stands for Quick Response Code. It is a digital bar code that can be read by most smartphones, tablets, and other computer scanners.

Technology Requirements:

These addition task cards require students to use a QR reader app. They are available for free on most tablets and smartphones, including Android, iPhone, and iPad.

When students scan the codes with their QR app, the answer to the printed math problem will be displayed. Some apps may try to display the answer with a web browser. If this is the case, go to the settings or preferences and choose view in “plain text.”

Online Safety:

Students are not directed to websites to view the answers.

Please be aware that some free apps may contain advertisements.

Adult supervision is recommended whenever students use an Internet-enabled device.
