Materials:
• One die
• Printed game board with uppercase letters.

Preparation:
Print the game board and attach both halves together with glue.

How to play:
• This game can be played with individual students or small groups.
  The student rolls the die. The number that he/she rolls is the number of the column that he/she must read aloud.
  To build fluency, encourage the student to read all letters, as quickly as possible.
  If multiple students are playing together, they can take turns rolling the die and reading the columns of letters.
