

Butterfly Scavenger Hunt Activity

Materials:

Butterfly questions worksheet (pages 2-3),
18 butterfly fact cards (pages 4-8),
Scissors and scotch tape

Preparation

Print the fact cards and cut them apart.

Make copies of the butterfly questions worksheet (2-sided). Each student will need his or her own copy.

Hide all 18 butterfly fact cards around your classroom where students will be able to find them.

Management tips

You may want to make this a silent activity so students don't share answers with each other. You can have the kids work by themselves or with partners.

Don't be afraid to hide the facts in tough places. Kids think it's more fun when they have to search around a little.

Examples of good hiding spots might include:

- sticking out of a book, like a bookmark
- the back of the classroom door
- laying flat on the bookshelf
- on the back of the teacher's chair
- on the side of your computer monitor

Have a plan for students who finish early. You may want to have an assignment for them to complete when they're done, or you may have them help other students find fact cards.

Butterflies have a long, thin tube called a proboscis on their head. The proboscis is like a straw that is used to drink nectar from flowers.

When a butterfly first comes out of its chrysalis it cannot fly. Its wings are damp and wrinkled. It hangs upside down for an hour or more so blood can get into its abdomen and wings.
