3. List some of a frog's natural predators. Also, list some animals that are a frog's prey.

4. How are amphibians and reptiles the same? How are they different?

ANSWER KEY

Frog Thinking Questions

1. Is an adult frog an herbivore, omnivore, or carnivore? Explain.

An adult frog is a carnivore because it only eats other animals.

2. Are you more likely to find frog eggs in a pond with lots of fish or a pond with very few fish? Why?

You would be more likely to find frog eggs in a pond with very few fish because fish eat frog eggs.

3. List some

predators

prey - flies, crickets, mosquitoes, dragonflies (and many more)

prey.

4. How are amphibians and reptiles the same? How are they different?

same: Amphibians and reptiles are both cold-blooded. They both lay eggs. Both are vertebrates.

different: Amphibians go through metamorphosis, reptiles look the same throughout their lives. Reptiles have scales but amphibians don't.
