A Long Walk to Water

Chapters 11–14

In chapters 11–14, Salva faces many difficult challenges—crossing dangerous rivers, coping with loss, and gradually becoming a leader to the other boys. Imagine you are part of Salva's group on this journey. Describe in detail what role you would take in the group and explain why. Would you be a leader like Salva, a helper who supports others quietly, or a different kind of team member? Consider the skills, strengths, and personal qualities you bring. Explain how your role and skills would help the group survive and succeed during such a difficult journey.
