Do you like science? I do. I went to school for many years. I took many science classes to be able to do my work.

Do you like animals? I do. I take care of animals.

The animals I take care of might be small pets, such as dogs or cats.

Sometimes I take care of farm animals, such as sheep, cows, and horses.
I am a veterinarian.

I might even work at a zoo and take care of lions and tigers!

I try to make sick animals well. I try to keep well animals healthy.
