

What are we?

Monday's  
Clue

We are insects.  
Thousands of kinds  
of us exist. You can  
find us most places  
in the world.

What are we?

Tuesday's  
Clue

Some of us help  
people. We make  
tunnels in the soil that  
allow air to go in it. That  
makes the soil better for  
farmers. Some of us eat  
other insects that hurt  
farmer's crops.

Wha  
are we?

Some of us are pests.  
We eat farmer's crops.  
Some of us try to live in  
people's houses. We  
like to eat sugar and  
other people food.

eday's  
Clue

We are social insects.  
That means we live in  
colonies with others of  
our kind. We work hard.

What are we?

Friday's  
Clue

We are often black.  
Some of us are red,  
brown, yellow, green,  
or purple.

What are we?

Bonus  
Clue

We are often very tiny,  
but some of us are  
more than an inch  
long.

# What Are We?

By Linda Andersen

We are insects. Thousands of kinds of us exist. You can find us most places in the world.

Many of us live in the soil. Some of us live other places, such as in wood or acorns.

Some of us help people. We make tunnels in the soil that allow air to go in and out. Some of us eat

other insects.

Some of us try to live in people's houses. We like to eat sugar and other people's food.

We are social insects. That means we live in colonies with others of our kind. We work hard.

We are often very tiny, but some of us are more than an inch long.

We are often black. Some of us are red, brown, yellow, green, or purple.

What are we?
