

What are we?

Monday's
Clue

We are a type of bird. About 17 different kinds of us exist.

What are we?

Tuesday's
Clue

Most birds are afraid of people. We usually are not. If you sit quietly, we may come right up to you and peck at your clothing.

What are we?

Thursday's
Clue

We are larger than most birds. We can be as tall as you are (about four feet tall) or as small as fourteen inches.

When we're full grown we might weight as much as 90 pounds or as little as four pounds.

C-5

Most birds fly. We do not. We spend most of our time at sea and are very good at swimming and diving. We can hold our breaths for up to twenty minutes under water. We find our meals of fish and other creatures in the sea.

C-5

What are we?

Friday's
Clue

We all live in the Southern Hemisphere, which is the bottom half of the world. Some of us live at Antarctica, the coldest place in the world.

What are we?

Bonus
Clue

Like you, we stand and walk upright. We have short legs. We swing from side to side a bit (or waddle) as we walk.

We are usually black and white. We look like we are all dressed up in tuxedos!

What Are We?

By Linda Andersen

We are a type of bird. About seventeen different kinds of us exist.

Most birds are afraid of people. We usually are not. If you sit quietly, we may come right up to you and peck at your clothing.

Most birds fly. We do not. We spend most of our time at sea and are very good at swimming. We find our meals in the water. We are about 100 centimeters (1 meter) tall) or as small as ten centimeters. When we are fully grown, we might weigh as much as 90 pounds, or as little as four pounds.

We all live in the Southern Hemisphere, which is the bottom half of the world. Some of us live at Antarctica, the coldest place in the world.

Like you, we stand and walk upright. We have short legs. We swing from side to side a bit (or waddle) as we walk.

We are usually black and white. We look like we are all dressed up in tuxedos!
