

What are we?

Monday's
Clue

Some people do not like us!
Perhaps they think we spread
disease, though we rarely do.
Or, they may not like our looks.
We do have pointy teeth and
some of us resemble mice.

What are we?

Tuesday's
Clue

Perhaps people think our
sleeping habits are funny. We
sleep hanging upside down in
such places as under bridges,
inside of caves, or inside of
hallowed out trees. We are
nocturnal, which means that
we are active at night and
sleep during the day.

What
are we?

Thursday's
Clue

More than 1100 kinds of us exist.
We can be white, gray, brown,
or reddish brown. We can be as
small as one inch from head to
toe, or as large as one foot from
head to toe.

Many of us like to eat insects.
Some of us dine on mice and
lizards. Others of us eat only fruit
and pollen.

What are we?

Friday's
Clue

We are quite talented. Have you ever seen a flying skunk, a flying rat, or a flying dog? No, most mammals cannot fly. We, however, have wings and are the only mammals that can truly fly.

What are we?

Bonus
Clue

We are very useful. We rid the world of large numbers of pesky insects. We spread seeds over the earth and we pollinate plants. A few of us may even help make sick people well! Some of us have a special substance in our saliva that keeps blood flowing. Scientists have made a medicine from this substance that may help people who have had heart attacks and strokes.
