

What are we?

Monday's
Clue

We are a kind of bird. Many species of us exist in many parts of the world. Our species have names such as *Great Horned*, *Snowy*, *Great Gray*, *Barred*, and *Monkey-faced*.

What are we?

Tuesday's
Clue

How would you like to dine regularly on skunks? One of our species, "Great Horned," does just that. "Great Horned" also kills and eats other species of us! Most of us eat rodents, such as mice. Some of us eat rabbits, squirrels, woodchucks, frogs, insects, other birds, or snakes.

Monday's
Clue

We can see and hear very well. That makes us good hunters. Most of us are nocturnal, which means we hunt at night. A few of us hunt during the day. Our fluffy feathers keep us warm even in cold climates.
