

Name: _____

Periodic Table of Elements

The **periodic table** displays all known chemical elements organized by atomic number (number of protons in the nucleus) and electron configuration. This creates groups of elements with similar chemical properties.

Instructions: Fill in the element symbols. Then use colored pencils or markers to complete the key and show which

1	
2	
3	4

13	14	15	16	17	18
5	6	7	8	9	10
