

I Have... Who Has...

Element Names and Symbols

How to play the game:

- Distribute the cards randomly to your students. Some students may get more than one card.
- Select a student to begin by reading their card aloud. (example: I have Hg. Who has oxygen?)
- The student who has the card with the correct answer to the previous student's "Who Has..." question reads their card aloud. (example: I have O. Who has silicon? And so on.)
- Students must listen for their turn and try not to break the chain.
- When the chain circles around to the first student, the game is over.

Suggestions:

- Print out the "I Have... Who Has..." flashcards on card stock and laminate them so they will last for many years to come.
- Practice the game once with your students so they understand how the game works, then see if they can "beat the timer." Set a timer for 2 minutes, 5 minutes, or any amount of time you choose. Challenge your students to finish the game before the timer goes off.

Answer Chain:

A. I have Hg. Who has oxygen?
B. I have O. Who has silicon?
C. I have Si. Who has zinc?
P. I have Ni. Who has neon?
Q. I have Ne. Who has aluminum?
R. I have Al. Who has carbon?
