An **acronym** is a kind of abbreviation formed by the first letter(s) of each word or important word in a phrase. The term best applies to abbreviations pronounced like words, such as **GOAT** (greatest of all time). However, most people use the term even for those pronounced one letter at a time, such as **BLT** (bacon, lettuce, and tomato).

Acronyms are almost always written without periods and in all capital letters.

Replace the bold phrase with its six-letter acronym.

I love watching **National Association for Stock Car Auto Racing** races.

Name: _____

Passage 1

To conserve is to protect. Conservationists want to protect the environment. You may think that only means stopping forests from being cut down or working to save a few threatened animals. But there's a bigger threat.

Climate change is a threat to the whole world. Climbing temperatures cook corals. They make stronger storms. They even change rain patterns. This, in turn,

Passage 2

Even if habitat loss and rising temperatures stopped today, conservationists would need to solve Earth's big plastic problem.

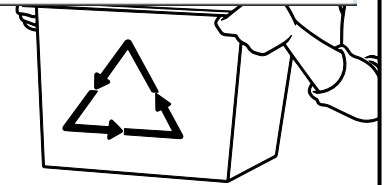

We all know plastic is bad news for Mother Nature. It can trap animals and damage plants. Small pieces can choke or block intestines. Plastics can take hundreds of years to break down. Even then, they mostly break into tinier and tinier pieces. These microplastics are in
