Name: _____

Fire Safety Check

Inspect your home to see if it is fire-safe.

You should have a smoke detector on
each level of your home. How many
smoke detectors does your home have?   _____

Where are they located? _____

_____

You should check your smoke
detectors at least twice each year
to make sure they're working. With
a parent, push the button on each
one to make sure the alarm works.

Carbon monoxide is a dangerous gas that can sometimes get into a home. Every
home should have a detector that will make a sound if it senses carbon monoxide.
Sometimes a carbon monoxide detector is part of the smoke detector. Sometimes
it's a separate unit.

Does your home have a carbon monoxide detector?   yes   no
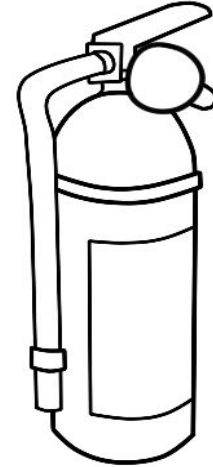

You should have at least one fire extinguisher in your home. Some homes have more than one. The best place to keep a fire extinguisher is in the kitchen, since that's where fires are most likely to happen.

How many fire extinguishers does your home have? _____

Where are they located? _____

_____

Most fire extinguishers have a small gauge that tells whether it is full or empty. Some will say *full* and *empty*. Others will say *undercharged*, *charged*, and *overcharged*. These gauge will help you know whether your fire extinguishers will work properly.
