Equivalent Fractions

Use the models to find equivalent fractions.

\[
\frac{2}{4} = \frac{1}{2} \quad \frac{2}{3} = \frac{2}{6}
\]

Shade the models and write the equivalent fractions.

\[
\frac{1}{4} = \frac{1}{4} \quad \frac{4}{6} = \frac{2}{3}
\]

\[
\frac{1}{2} = \frac{3}{6}
\]
Equivalent Fractions

Use the models to find equivalent fractions.

\[
\frac{2}{4} = \frac{1}{2} \quad \frac{2}{3} = \frac{4}{6}
\]

\[
\frac{1}{2} = \frac{3}{6} \quad \frac{3}{6} = \frac{4}{8}
\]
