1. Fractions

What fraction of the shape is shaded?

2. Fractions

What fraction of the circle is red?

Salomé bought 10 red apples and 3 green apples.

What fraction of her apples are green?

What fraction of the faces are smiling?
5. Fractions

What fraction of the shape is shaded?

6. Fractions

What fraction of the square is blue?

Liam has 7 orange golf balls and 3 white golf balls.

What fraction of his golf balls are orange?

What fraction of the squares are to the right of the line?
9. Fractions

What fraction of the shape is shaded?

Jasmine has 3 crayons. One is pink. One is blue. One is brown.

What fraction of her crayons are pink?

10. Fractions

What fraction of the octagon is blue?

What fraction of the stars are black?
13. Fractions

What fraction of the shape is shaded?

14. Fractions

What fraction of the triangle is blue?

---

There are 10 boys and 7 girls in Mrs. Smith’s class.

What fraction of her students are girls?

What fraction of the circles are inside the square?
17. Fractions
What fraction of the shape is shaded?

18. Fractions
What fraction of the star is green?

There are 5 birds in a tree. 3 are bluebirds. 2 are robins.
What fraction of the birds are bluebirds?

What fraction of the flowers are in a vase?
21. Fractions
What fraction of the shape is shaded?

22. Fractions
What fraction of the oval is red?

Rosie is at the beach. She has 4 sand pails. One pail has sand in it. The rest do not.

What fraction of her pails have sand?

What fraction of the boats are sailboats?
25. Fractions
What fraction of the shape is shaded?

26. Fractions
What fraction of the hexagon is green?

Dad baked 11 cookies. He ate 6 of them.
What fraction of the cookies did he eat?

What fraction of the faces have hair?
29. Fractions
What fraction of the shape is shaded?

30. Fractions
What fraction of the trapezoid is orange?

This file contains 30 task cards.

There are countless ways to use task cards in your classroom. Here are a few ideas:

1. Math Learning Center
   Place all of the cards on a table in the classroom. Small groups of 3 to 5 students can visit the table and solve the problems on the task cards. They can complete them in any order they'd like. You can have them do as many, or as few, problems as you choose.

2. Dry-Erase
   Laminate the cards. Then invite students to write on the cards with a dry-erase marker as they solve.

3. Back-to-Back Game
   Two students draw a task card at random. Then they sit back-to-back as they solve the math problem on the card. After they've finished, they turn, face-to-face, to compare their answers.

4. Classroom Scavenger Hunts
   Place task cards all around the room. (Examples: on the classroom door, attached to a student's chair, hanging from the classroom bookshelf) Students must search for the cards and solve the math problems.

5. Morning Challenge
   Place all of the task cards in a basket. When students enter the classroom in the morning, they choose one card from the basket to solve.

6. Interactive White Board Lessons
   If you have a document camera attached to an interactive white board, you can display task cards for students to solve.

7. Extra Help
   Have a parent, friend, or volunteer sit with individual students who need extra help. They can practice by solving the problems on the task cards together.
