1. Subtracting Fractions with Unlike Denominators

\[
\frac{1}{2} \quad \frac{2}{5}
\]

- \[
\frac{3}{5} - \frac{1}{10}
\]

2. Subtracting Fractions with Unlike Denominators

Find the difference of \( \frac{1}{3} \) and \( \frac{1}{4} \).

Write your answer as a fraction or mixed number in simplest form.

Emma is making trail mix.
She used \( \frac{1}{3} \) of a cup of peanuts and \( \frac{1}{5} \) of a cup of almonds. How many more cups of peanuts did she use than almonds?

Write your answer as a fraction or mixed number in simplest form.
5. Subtracting Fractions with Unlike Denominators

\[
\frac{8}{10} - \frac{2}{5} = \frac{5}{5} - \frac{1}{10} = \frac{1}{10}
\]

6. Subtracting Fractions with Unlike Denominators

Max is running in a team relay event. His part of the race is \(\frac{2}{3}\) of a mile. He has already run \(\frac{1}{2}\) of a mile. How many more miles does Max need to run?

Find the difference of \(\frac{2}{3}\) and \(\frac{1}{4}\). Write your answer as a fraction or mixed number in simplest form.
9. Subtracting Fractions with Unlike Denominators

\[ \frac{1}{2} - \frac{1}{10} \]

10. Subtracting Fractions with Unlike Denominators

\[ \frac{3}{4} - \frac{1}{3} = \]

---

Palette:

Find the difference of \( \frac{1}{2} \) and \( \frac{3}{10} \).

Write your answer as a fraction or mixed number in simplest form.

Paige and Trey are reading the same book for class. So far, Paige has read \( \frac{4}{5} \) of the book, and Trey has read \( \frac{1}{3} \) of the book. How much more of the book has Paige read than Trey?

Write your answer as a fraction or mixed number in simplest form.

Super Teacher Worksheets - www.superteacherworksheets.com
13. Subtracting Fractions with Unlike Denominators

\[ \frac{3}{5} \quad \frac{1}{2} \]

Find the difference of \( \frac{4}{5} \) and \( \frac{2}{4} \).

Write your answer as a fraction or mixed number in simplest form.

14. Subtracting Fractions with Unlike Denominators

\[ \frac{3}{4} \quad \frac{2}{3} \]

The Dugan family ordered two pizzas for dinner. They ate \( \frac{1}{2} \) of the first pizza and \( \frac{1}{4} \) of the second pizza. How much more of the first pizza did they eat?

Write your answer as a fraction or mixed number in simplest form.
17. Subtracting Fractions with Unlike Denominators
\[
\frac{2}{3} - \frac{1}{2}
\]

18. Subtracting Fractions with Unlike Denominators
\[
\frac{2}{3} - \frac{4}{10} =
\]

Find the difference of \(\frac{8}{10}\) and \(\frac{1}{3}\).

Write your answer as a fraction or mixed number in simplest form.

Mr. Swanson had \(\frac{2}{4}\) of a tank of gas in his car. He used \(\frac{1}{5}\) of it driving to work. How much of the tank of gas is left in his car?

Write your answer as a fraction or mixed number in simplest form.
21. Subtracting Fractions with Unlike Denominators

\[
\frac{2}{5} - \frac{1}{3} =
\]

22. Subtracting Fractions with Unlike Denominators

\[
\frac{2}{4} - \frac{1}{10} =
\]

Find the difference of \(\frac{3}{4}\) and \(\frac{5}{10}\).

Write your answer as a fraction or mixed number in simplest form.

Mikaylah lives \(\frac{7}{10}\) of a mile from school. She already walked \(\frac{1}{2}\) of a mile. How many miles does she have left to walk?

Write your answer as a fraction or mixed number in simplest form.
25. Subtracting Fractions with Unlike Denominators

\[ \frac{2}{3} - \frac{2}{5} \]

26. Subtracting Fractions with Unlike Denominators

\[ \frac{1}{2} - \frac{2}{10} = \]

---

Silas was making a fruit salad.
He added \( \frac{3}{4} \) of a cup of strawberries and \( \frac{1}{2} \) of a cup of blueberries. How many more cups of strawberries did he use?

Find the difference of \( \frac{4}{5} \) and \( \frac{2}{3} \).

Write your answer as a fraction or mixed number in simplest form.

Write your answer as a fraction or mixed number in simplest form.
29. Subtracting Fractions with Unlike Denominators

\[ \frac{3}{10} \]

Write your answer as a fraction or mixed number in simplest form.

Task Cards: Subtracting Fractions with Unlike Denominators

This file contains 30 task cards.

There are countless ways to use task cards in your classroom. Here are a few ideas:

Have a parent, friend, or volunteer sit with individual students who need extra help. They can practice by solving the problems on the task cards together.
