## Area of a Rectangle

To find the area of a rectangle, use the formula length $\mathbf{x}$ width $=$ area.
This formula is often written as $\boldsymbol{l} \mathbf{x} \boldsymbol{w}=\boldsymbol{A}$.
The rectangle pictured here has a length of 10 cm and a width of 8 cm .
$l=10 \mathrm{~cm}$
$\boldsymbol{w}=8 \mathrm{~cm}$
$10 \mathrm{~cm} \times 8 \mathrm{~cm}=80 \mathrm{~cm}^{2}$
Note that the area's unit is written as $\mathrm{cm}^{2}$.
This is said as "square centimeters" or "centimeters squared".
