Find the sum of the integers in the triangles.

$$\triangle 6 \times \triangle (-17) = -11$$

Find the sum of the integers in the octagons.

$$\text{octagon } -8 + \text{octagon } (-12) = -20$$

Find the sum of the integers in the trapezoids.

$$\text{trapezoid } 12 + \text{trapezoid } (-7) = 5$$
