</tbody>
</table>

1. Lines of __________________________ measure how far from the equator a place is.
2. Lines of __________________________ run from the North Pole to the South Pole.
3. Lines of longitude run _______________ and _______________.
4. Lines of latitude run _______________ and _______________.

5. The invisible line at 0º longitude is the __________________________.
6. The invisible line at 0º latitude is the __________________________.
7. Lines of latitude are also called __________________________._
8. Lines of longitude are also called __________________________.

Part II: Circle the best answer for each question.

9. What shape is the planet Earth?
   a. hemisphere   b. circle   c. hemicube   d. sphere

10. Which Hemisphere are both North America and South America found in?

11. Which Hemisphere are Asia, Australia, and most of Europe found in?

12. Which Hemisphere are both South America and Antarctica found in?
Latitude, Longitude, and Hemispheres

Part III: Tell what each picture illustrates.

13. Which hemisphere is shown by the picture? __________

14. What do the lines in this picture show? __________

Part IV: Write one or more complete sentences to answer each question.

15. How is a hemisphere different from a sphere?

_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________

16. How is 90° north latitude different from 90° south latitude

_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________
Part I: Choose the best word(s) from the box to complete each sentence.

</table>

1. Lines of **latitude** measure how far from the equator a place is.

2. Lines of **longitude** run from the North Pole to the South Pole.

3. Lines of longitude run **north** and **south**.

4. Lines of latitude run **east** and **west**.

5. The invisible line at 0º longitude is the **Prime Meridian**.

6. The invisible line at 0º latitude is the **equator**.

7. Lines of latitude are also called **parallels**.

8. Lines of longitude are also called **meridians**.

Part II: Circle the best answer for each question.

9. What shape is the planet Earth?
   - a. hemisphere
   - b. circle
   - c. hemicube
   - d. sphere

10. Which Hemisphere are both North America and South America found in?
    - a. Eastern Hemisphere
    - b. Southern Hemisphere
    - c. Western Hemisphere
    - d. Northern Hemisphere

11. Which Hemisphere are Asia, Australia, and most of Europe found in?
    - a. Western Hemisphere
    - b. Southern Hemisphere
    - c. Northern Hemisphere
    - d. Eastern Hemisphere

12. Which Hemisphere are both South America and Antarctica found in?
    - a. Southern Hemisphere
    - b. Northern Hemisphere
    - c. Eastern Hemisphere
    - d. Western Hemisphere
Part III: Tell what each picture illustrates.

12. Which hemisphere is shown
