1. Madeline bought nine pumpkins. Two of them did not have a stem. What fraction of Madeline’s pumpkins had a stem? (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)

Answer: ______________

2. Jaylen hung five rubber bats from the ceiling. Three of the bats were black. The rest were brown. What fraction of Jaylen’s bats were brown? (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)

Answer: ______________

3. Hannah, Jenna, and Raquel each made a scarecrow. Hannah and Jenna put hats on their scarecrows. Raquel did not. What fraction of the scarecrows had hats? (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)

Answer: ______________

4. Juan hung seven stuffed ghosts on the wall. Two were gray. One was white. The rest were blue. What fraction of the ghosts were blue? (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)

Answer: ______________
Halloween Fractions

1. Madeline bought nine pumpkins. Two of them did not have a stem. What fraction of Madeline’s pumpkins had a stem?
   (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)
   Answer: \( \frac{7}{9} \) had a stem

2. Jaylen hung five rubber bats from the ceiling. Three of the bats were black. The rest were brown. What fraction of Jaylen’s bats were brown?
   (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)
   Answer: \( \frac{2}{5} \) were brown

3. Hannah, Jenna, and Raquel each made a scarecrow. Hannah and Jenna put hats on their scarecrows. Raquel did not. What fraction of the scarecrows had hats?
   (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)
   Answer: \( \frac{2}{3} \) had hats

4. Juan hung seven stuffed ghosts on the wall. Two were gray. One was white. The rest were blue. What fraction of the ghosts were blue?
   (Draw a picture to help you find your answer. Be sure your answer is written as a fraction.)
   Answer: \( \frac{4}{7} \) were blue
