

Name: _____

Measuring Capacity

Remember: 1 gallon = 4 quarts = 8 pints = 16 cups

1 gallon = 4 quarts

1 quart = 2 pints

1 pint = 2 cups

Fill in the correct number for each statement.

a. 2 gallons = _____ pints

b. 4 gallons = _____ quarts

c. 3 quarts = _____ pints

d. 6 quarts = _____ cups

e. 5 pints = _____ cups

f. 3 gallons = _____ cups

Circle the greater amount for each pair.

g. 4 quarts or 2 gallons

h. 20 quarts or 4 gallons

i. 12 cups or 3 pints

j. 4 cups or 2 quarts

k. 16 pints or 4 quarts

l. 12 pints or 12 quarts

Circle the best answer and explain.

m. Each day, Isaac feeds his puppy one cup of dog food in the morning and one cup in the evening. How much food does Isaac feed his puppy during a week?

less than 1 gallon

exactly 1 gallon

more than 1 gallon

ANSWER KEY

Measuring Capacity

Remember:

1 gallon = 4 quarts = 8 pints = 16 cups

1 gallon = 4 quarts

1 quart = 2 pints

1 pint = 2 cups

Fill in the correct number for each statement.

- a. 2 gallons = 16 pints
- b. 4 gallons = 16 quarts
- c. 3 quarts = 6 pints
- d. 6 quarts = 24 cups
- e. 5 pints = 10 cups
- f. 3 gallons = 48 cups

Circle the greater amount for each pair.

- g. 4 quarts or 2 gallons
- h. 20 quarts or 4 gallons
- i. 12 cups or 3 pints
- j. 4 cups or 2 quarts
- k. 16 pints or 4 quarts
- l. 12 pints or 12 quarts

Circle the best answer and explain.

- m. Each day, Isaac feeds his puppy one cup of dog food in the morning and one cup in the evening. How much food does Isaac feed his puppy during a week?

less than 1 gallon

exactly 1 gallon

more than 1 gallon

Isaac feeds his puppy a pint of food each day. Seven pints is less

than one gallon.
