Weight Questions

1. The sign at a pumpkin patch reads:

Pumpkins for Sale!

0 - 5 lbs. - \$2

5 - 10 lbs. - \$4

10 - 20 lbs. - \$6

Tyler weighed his pumpkin on the scale and found it was 96 ounces. How much did his pumpkin cost? Explain how you found your answer.

He paid \$4. 96 ounces divided by 16 ounces in a pound equals six pounds.

2. George
puppy

3. Olive's father was carrying a cardboard box filled with dishes. He said, "This box weighs a ton!" About how much do you think his box really weighed? Explain.

Olive's father is exaggerating. The box couldn't weigh a ton, or else it would be as heavy as a small car. The box of dishes may have weighed between 40 and 90 pounds.

Now try this: Calculate your own weight in ounces.
