statements in the form of a possessive noun.

After they have completed the worksheets, you can go over the answers together with the class.

**Mangement:** You may want to make this a silent activity so students don't share answers with each other.

The students can work alone or with a classmate.

Don't be afraid to hide the cards in tough places. Students often think it is more fun when they have to search around.

Have a plan for students who finish early. You may want to have an assignment for them to complete when they are done, or you may have them help other students find the cards.
