# Groundhog Day

by BJ Lee

If you see a groundhog  
on his special day,  
stand silent and watch him.  
Don't get in his way.

If he sees his shadow,  
he'll flee  
it's six more  
then spring!

the printable version of this worksheet.

If there is no shadow,  
he'll stay out and play;  
and spring will start early,  
or so people say.

It's true some folks trust in  
the groundhog's prediction,  
but what do you think—  
is it fact or just fiction?
