Groundhog Day
by BJ Lee

If you see a groundhog on his special day, stand silent and watch him. Don’t get in his way.

If he sees his shadow, he’ll flee to his hollow; it’s six more weeks winter, then springtime will follow.

If there is no shadow, he’ll stay out and play; and spring will start early, or so people say.

It’s true some folks trust in the groundhog’s prediction, but what do you think—is it fact or just fiction?
