Camouflaged Creatures

by Guy Belleranti

In nature, predators and prey seem to play a game of hideand-seek. Prey need to hide, so predators do not find them and eat them. Predators need to hide too, so smaller prey cannot see them approaching. Some animals have special colors or marks on their bodies that help them hide among trees, rocks, and grass. This blending is called camouflage.

Can you see the green snake in this picture? The snake's shape and color help it hide among

the areas forest leaves.

The earth tone colors of deer and squirrels help them hide

from preda' brown squir among browhen it is hi special cok

African lions have a tan body coloring. However, lions use it not to hide from predators, but to hide in savanna grasses while watching for prey. A lion can sneak up on prey without being seen more easily by blending into the grassy environment.

Another popular animal camouflage color is green. The green tree frogs of Australia blend in and hide from predators better because of their color. Green tree pythons and emerald boas, meanwhile, are more like lions, using their green color to blend in. When a likely meal (a rodent, bird or lizard) comes along these snakes strike quickly, catching the prey.

This owl sleeps during the day, so it does not want to be seen by other animals. Notice how its feather pattern and coloring match the tree trunk.

Is this polar bear camouflaged to protect itself from predators or to hunt prey?

The praying mantis takes things a step further. While its green to brown color helps it blend in with vegetation, the mantis also mimics the shape of a stem or leaf. The mantis uses these camouflage methods both to hide from predators like birds, frogs, snakes, spiders and bats, and to await prey such as insects (including other mantises!), spiders, hummingbirds, and small frogs and mice.

Just as important as color camouflage and mimicry is pattern camouflage. Tiger stripes and leopard and jaguar spots are all patterns which help these cats hide among the plants and shadows when they search for prey.

In nature, hide-and-seek is a game of life and death.

Pattern and color camouflage, and mimicry, can give predators

and prey a animals tha

This praying mantis' body mimics its environment. It looks much like a leaf or twig. This type of blending is called mimicry.

ipes that 3 tall grass. flage.

Camouflaged Creatures

by Guy Belleranti

- 1. How does a lion's special coloring help it survive?
 - a. It helps protect the lion from predators.
 - **b.** It helps the lion sneak up on predators without being heard.
 - c. It helps the lion hunt prey without being seen.
 - d. It makes the lion completely invisible.
- 2. Explain how a praying mantis uses more than just color to blend into its surroundings.

- **d.** It makes the polar bear more difficult to see underwater.
- **4.** Read the following sentence from the article and choose the best definition for the underlined words.

The <u>earth tone</u> colors of deer and squirrels help them hide from predators.

- a. color of summer leaves
- **b.** color of the morning sky
- c. color of soil and ground
- **d.** color of the planet Earth

Challenge: Draw a picture of a scene in nature. Include several camouflaged animals in your picture.

ANSWER KEY

Camouflaged Creatures

by Guy Belleranti

- 1. How does a lion's special coloring help it survive? c
 - a. It helps protect the lion from predators.
 - **b.** It helps the lion sneak up on predators without being herd.
 - c. It helps the lion hunt prey without being seen.
 - **d.** It makes the lion completely invisible.
- 2. Explain how a praying mantis uses more than just color to blend into its surroundings.

A praying mantis is shaped like a leaf or twig. This is called mimicry.

3. How

4. Read the following sentence from the article and choose the best definition for the underlined words.

The <u>earth tone</u> colors of deer and squirrels help them hide from predators. <u>c</u>

- a. color of summer leaves
- **b.** color of the morning sky
- c. color of soil and ground
- d. color of the planet Earth

Challenge: Draw a picture of a scene in nature. Include several camouflaged animals in your picture.
