

Grasshoppers

Written and Photographed by Sandie Lee

It's a summer-time singer. Its body has several legs, wings, and eyes. Farmers either love it or hate it. What is it? A grasshopper of course.

There's between 11,000 and 18,000 species of grasshoppers worldwide and they're found everywhere except the North and South Poles. And even though they're common, they're also quite fascinating.

The Body

Grasshoppers have an exoskeleton [ek-soh-**skel-i-tn**] which means the skeleton is on the outside of their body. They have two sets of wings for flying – a front pair that is tough and rigid and a hind pair that is soft and flexible. The grasshopper also has three pairs of very strong legs. They use these to walk and jump.

A cartoon illustration of a fly dressed as a superhero. The fly has a large, smiling face with three eyes: one on each antenna and one between them. It is wearing a red and blue superhero costume with a 'M.J.' emblem on its chest. The fly is flying towards the right.

Grasshoppers don't have ears, but that doesn't mean they're deaf. They actually hear through their knees. The tympanum [**tim**-puh-nuh *m*], a drum-like organ, can pick up vibrations from the air and on the ground.

Music Makers

If you hear a *chirp chirp chirp* on a summer's night, it could be a male grasshopper trying to attract a mate, or warn off other males. They do this by rubbing their back leg against their forewing - A row of pegs along the inside of the grasshopper's leg acts like a file. When this is rubbed on the wing it causes a vibration which produces the sound.

Other grasshoppers like the **Band-Winged Grasshopper** will snap their hind wings rapidly when in flight. This makes a weird crackling sound.

Friend or Foe?

Grasshoppers like to eat most plants, but some favor the flavor of wheat, oats, corn, barley, rye,

4. Why do farmers sometimes dislike grasshoppers?

5. Why do farmers sometimes like grasshoppers?

Name: _____

Grasshoppers

Vocabulary Activity

Step 1: Re-read the article, "Grasshoppers." As you read, use a highlighter or yellow crayon to highlight each of the vocabulary words from the box.

exoskeleton

organ

vibration

foe

barley

toxic

Step 2: Match each vocabulary word with its definition.

1. exoskeleton a. enemy

2.

3.

4.

5.

6.

Step 3

7.

8.

9.

10. The liver is the heaviest _____ in the human body.
