More Than Just a Snack Food

By Sandie Lee

It's been around for over 5,000 years. It was an important staple to the Aztec Indians, and it even helped in the inventing of the first microwave oven. Can you guess what it is? That's right, it's popcorn.

The oldest corn ever discovered was found in a New Mexico rock

Garlands and headdresses were made from thick rows of popcorn and used in traditional dances. Popcorn was also thought to bring peace and goodwill. Perhaps that is why statues of one of their most important gods, Tlaloc (*Tlahloc*), their ancient god of rain, were

also adorned with popcorn necklaces.

One account tells of the Aztec people scattering *momchitl* before the fishermen went out to sea. The popped corn represented hailstones and was given to the god of water, in hopes of a safe journey for them.

Popcorn poppers have changed drastically over the years. Some ancient poppers were made out of soapstone or clay. This covered bowl was hung from a tripod-like holder and placed directly over the fire. Another method of popping corn is from the Winnabago Indians. They just stabbed a pointy stick through the entire cob, then held it close to the fire. When finished, it was eaten like corn-on-the-cob.

Popcorn pops into one of two shapes: the snowflake, which is big and fluffy, or the mushroom which is round and firm.

When he was working with the magnatron, he realized the candy bar in his pocket had melted. So being the electronics whiz that he was, Percy Spencer had an idea and immediately sent for some popcorn. This time he placed the popcorn kernels near the tube and soon history was made. The kernels popped, and he went on to create the first microwave oven.

Who knew popcorn had such a history? From caves to ceremonies to microwaves, this fun food has seen it all. Perhaps that's why it has stood the test of time and still remains a favorite today. The biggest popcorn ball recorded today is from The Popcorn Factory in Lake Forest, Illinois. It weighs in at 3,423 pounds and is 8 feet in diameter and 24.5 feet around. That's about 50,000 times bigger than normal popcorn balls and it's all edible.

There's actually a National Popcorn Day. It's celebrated on January 19th. So get popping and celebrate!
