

Name: _____

Red Pandas

by Guy Belleranti

I smile as I watch a cinnamon colored, bushy-tailed red panda rest in a tree at the zoo. Its cream-colored, kitten-like face is at least as cute as a giant panda's!

Despite the common name "panda," red pandas are not close relatives with giant pandas. DNA tests show the much larger giant pandas are bears. Red pandas are not bears. They're in their own unique family. Raccoons, which share the red pandas' ring-striped tails, are a distant relative.

at a time. Because of this, they must eat 2 to 4 pounds every day. That's a lot for an animal weighing only 6 to 14 pounds! In warmer weather, they also eat fruit and insects. Sometimes they eat eggs or even small animals.

Red pandas spend most of their time in the trees. Trees provide avenues of escape from predators like snow leopards and dholes (a type of wild dog). They're acrobatic climbers. They have semi-retractable claws to grip branches and long bushy tails for balance. They're usually mild-mannered, but they use their claws for defense if necessary. They can also release stinky odors from scent glands.

It can get pretty cold where red pandas live. Red pandas use their bushy tails as blankets in cold weather. Their thick fur and furry feet also provide warmth. Furry paw pads keep them from slipping on wet branches and snow.

Red pandas have excellent eyesight, hearing, and sense of smell. These senses, and special whiskers called vibrissae, help them search for food from dusk to dawn. During the day they usually rest
