# Science Lab Safety Rules Brainstorm

Brainstorm your own science lab safety rules with a partner.  
Then circle three rules you think are the most important.  
Be ready to share your rules with the class.

The diagram consists of a central rounded rectangular box containing the text "Science Safety Rules". Six lines radiate from this central box to connect it to six surrounding rounded rectangular boxes, arranged in two rows of three. Each of these six surrounding boxes contains five horizontal lines for writing.
