# ANSWER KEY

## Simple Machine Questions

1. A broom is a lever. Where is the fulcrum? Explain.

A broom's fulcrum is the hand that holds the top of the broomstick when you sweep. The broom is a lever and the hand in the top is the stationary point upon which the broom pivots.

2. An electric fan is made up of several simple machines. Tell where you would find an inclined plane on a fan. Also, tell where you would find a wheel and axle.

The blades on an electric fan are inclined planes. They are sloped to force air forward when the motor turns.

3. Explain.
