To the Moon
Space Trivia Board Game

Materials:

- game board (pages 2-3)
- space trivia question cards (pages 4-7)
- 6-sided die
- markers (any small object)

Preparation Tips:

- Print the question cards on card stock so players cannot see through the paper.

How to Play:

Begin by setting the markers on “Blast Off.”

Each player rolls the die to determine who will go first. The player with the higher number is Player 1. The player with the lower number is Player 2.

Player 1 rolls the die and moves the correct number of spaces. If the player lands on a square with directions, follow the directions.

Player 2 takes a question card and reads it aloud to Player 1. Player 1 tries to answer the question. If Player 1 is correct, he or she stays on the current square. If Player 1 is incorrect, he or she must go back to the square they were on at the beginning of the turn.

Then it is Player 2’s turn to roll the die and answer a question.

Continue taking turns until one player reaches the “Moon Landing.” The first player to land on it and correctly answer the question wins.

Remember:

A player can only cross the asteroid field if they land on the square that says, “You found a shortcut!”

If a player lands on “Lose a turn,” they skip their next turn.

Which is the only planet in the Solar System known to have life on it?
A: Earth

How far away is the Sun from Earth?
A: 93 million miles

How long does it take Earth to rotate once on its axis?
A: 24 hours

Which planet is famous for its big red spot?
A: Jupiter

What was the name of the first person to walk on the Moon?
A: Neil Armstrong

What was the name of the second person to walk on the Moon?
A: Buzz Aldrin

Which of these planets does not have rings: Jupiter, Uranus, Venus, or Neptune?
A: Venus

Which planet in the Solar System seems to be tilted sideways?
A: Uranus

Even though it is not really a star, which planet is nicknamed the “Morning Star?”
A: Venus

Even though it is not really a star, which planet is nicknamed the “Morning Star?”
A: Venus

Which of these planets does not have rings: Jupiter, Uranus, Venus, or Neptune?
A: Venus
Which planet is known as the “Red Planet?”
A: Mars

Is there gravity on the Moon?
A: yes

What planet is nicknamed the “Third Rock from the Sun?”
A: Earth

What planet is nicknamed the “Ringed Planet?”
A: Saturn

Name all four inner planets.
A: Mercury, Venus, Earth, and Mars

What does the International Space Station orbit?
A: Earth

Which of these planets does not have a moon: Neptune, Earth, Venus, or Mars?
A: Venus
