Subtraction Fluency Game

Materials:
• One die
• Printed game board with subtraction facts
• Answer page
• Scrap paper for keeping score (or they can write on back of answer page)

Preparation:
Print the game board and attach both halves together with glue.
Each pair of students receives one game board, an answer page, and one die.

How to Play:
• This is a 2-player game.
• Player 1 rolls the die. The number that the student rolls indicates which column of math facts that he/she must solve.
• For example, if the student rolls a 2, he/she will say the following, as quickly as possible. 9 -- 2 = 7, 10 -- 1 = 9, 5 -- 0 = 5, 8 -- 1 = 7, 7 -- 7 = 0, 9 -- 4 = 5
• Player 2 reads the answer sheet as player 1 says the math facts aloud. He/she checks to make sure that all answers are correct.
• If the player quickly and accurately answers all math facts, he/she scores 7 points. For each incorrect answer, one point is deducted. So, if the player only answers 5 correctly, he/she scores 5 points.
• The players then switch roles. Player 1 checks answers as player 2 rolls and reads math facts aloud.
• The player with the most points after 10 rounds wins.

Management Suggestions:
• You may want to limit the amount of time students have to answer all facts in a column. For example, you might give them 30 seconds per column.
