

Name: _____

The Largest Bird in the World

The biggest bird in the world is an ostrich.
It lives in Africa.

An ostrich can grow 9 feet (3 meters) tall. That's taller than a person! They have long necks. They also have big brown eyes. They can see far away.

Like penguins, they are a flightless bird. That means they cannot fly. Unlike penguins, they can run fast. They run fast because they have long, strong legs. They also use their legs to kick things.
